Product machine washable up to 60° (domestic wash). The washing instructions refer only to the fabric; for prints or embroidery, follow the recommendations of the screen printer or embroiderer.

Waterproof garment or fabric. The figure shown corresponds to the fabric's ability to withstand water pressure without allowing moisture to penetrate. The minimum standard is a water column of 1,500 mm/m².

(Low Shrinkage Fleece): high-quality fleece, 80% combed cotton, 20% polyester with low shrinkage. The inner and outer faces of the fabric contain a continuous filament that offers excellent resistance to washing. The outer face is perfect for printing, while the inner face is extremely comfortable.

Enzyme washing is a special biopolishing treatment that makes fabrics clean, smooth and blemish-free, creating a surface that is soft to the touch and perfect for printing.

Number of 500 ml plastic bottles used to make this recycled polyester product.

Breathable garment or fabric. The permeability indicated corresponds to the water vapour in grams that can evaporate from a surface of one square metre in 24 hours. The higher this figure, the more breathable the fabric.
